Professional profile

Full Stack Product Engineer focused on end-to-end B2B products and conversational AI systems. Experience across frontend, backend, data, APIs, RAG and integrations, with technical leadership on the DUPLEX SAT module.

Experience

Full Stack Product Engineer

Jan. 2026 – Present

Performanze

Madrid, Spain

- End-to-end development of **OVI and DUPLEX**, from functional and technical definition through frontend, backend, data, integrations, QA, deployment and direct client validation.
- **DUPLEX**: technical leadership for the SAT module and multi-equipment architecture covering **3 equipment families**, combining session memory, guided diagnosis, checklists, historical faults, escalation and source traceability; using LangChain, RAG, embeddings and pgvector to retrieve contextual technical knowledge.
- **OVI**: developed a multi-turn conversational assistant integrated with **5 Microsoft 365 services** through Microsoft Graph, with short- and long-term memory, semantic retrieval and artifact generation.
- Automated quality and delivery through E2E testing, quality gates and workflow validation before deployment and client review.

Software Developer

Jan. 2025 – Jan. 2026

Telefónica Tech

Madrid, Spain

- Frontend and backend development in **TrustOS**, working on digital identity and Verifiable Credential lifecycle flows.
- Developed **REST APIs** for credential issuance and verification with Node.js/TypeScript, MongoDB and OpenAPI contracts.
- Implemented QR issuance, presentation and verification flows integrating **PrivadoID, Procivis and Identy**.

Independent product

BROKI – Airport Operations Platform

2026

Designed and built a platform to centralise vehicle fleet, Ground Support Equipment (GSE), tools, personnel and operational traceability. End-to-end product development across data modelling, backend, PWA experience, realtime operational state and automated QA.

Technical skills

Languages: TypeScript, JavaScript, Python, C, C++, SQL, Bash

Frontend: React, Next.js, Vite, Tailwind CSS

Backend & APIs: Node.js, Express, REST APIs, GraphQL, PostgreSQL, Supabase, MongoDB

AI: LangChain, RAG, conversational memory, embeddings, pgvector, vector search, LLMs

Integrations: Microsoft Graph, OpenAPI, Gamma

Quality & delivery: Playwright, Husky, CI/CD, Docker, Vercel, Git

Languages spoken: Native Spanish and Catalan; intermediate English

Education

42 Madrid Programming Campus, Fundación Telefónica

2023 – Present

C/C++, UNIX, processes, concurrency and graphics. Selected projects: Minishell, cub3D and Philosophers.

Advanced Diploma in Networked Computer Systems Administration (ASIR), ITEP

2020 – 2022
