Professional profile

Full Stack Product Engineer focused on building and shipping end-to-end B2B products across frontend, backend, data, integrations and applied AI. Currently developing OVI and providing technical leadership for the DUPLEX SAT module at Performanze; previously worked on TrustOS at Telefónica Tech, building APIs and digital-identity workflows around verifiable credentials.

Experience

Full Stack Product Engineer

Jan. 2026 – Present

Performanze

Madrid, Spain

- End-to-end B2B product delivery across technical and functional definition, frontend, backend, data modelling, integrations, QA, deployment and client validation using TypeScript, React, Next.js, Supabase/PostgreSQL and Vercel.
- **DUPLEX**: technical leadership for the SAT module, an AI/RAG-assisted technical support system combining documentation, historical faults, guided diagnosis, checklists and source traceability.
- Designed and implemented the RAG pipeline: document ingestion and indexing, embeddings, pgvector/vector search and source-backed retrieval of technical knowledge.
- **OVI**: developed an AI productivity assistant integrated with Microsoft 365 through Microsoft Graph, connecting Outlook, Teams, Calendar and OneDrive/SharePoint with contextual knowledge, memory and artifact generation.

Software Developer

Jan. 2025 – Jan. 2026

Telefónica Tech

Madrid, Spain

- Frontend and backend development within **TrustOS**, working on digital identity, Verifiable Credentials and secure authentication flows.
- Implemented REST APIs with Node.js, Express and TypeScript, MongoDB persistence and Swagger/OpenAPI documentation.
- Built UI and QR flows for credential issuance, presentation and verification, integrating wallets and providers such as PrivadoID, Procvivis and Idenfy.

Independent product

BROKI – Operational platform modernisation

2026

Migrated a legacy Node.js/HTML/PostgreSQL/n8n application toward Next.js and Supabase, including data migration and normalisation, Supabase Edge Functions, RLS, Realtime, PWA delivery, functional parity and Playwright QA.

Technical skills

Languages	TypeScript, JavaScript, Python, C, C++ , SQL, Bash, HTML5, CSS3
Frontend	React, Next.js, Vite, Tailwind CSS, Angular, responsive UI, web accessibility
Backend & data	Node.js, Express, REST APIs, PostgreSQL, Supabase, MongoDB, Edge Functions, Realtime
AI & knowledge	RAG, LangChain, embeddings, pgvector, vector search, LLM integration, document processing
Microsoft 365	Microsoft Graph, Outlook, Teams, Calendar, OneDrive, SharePoint
Architecture & quality	MVC, RBAC, CI/CD, Docker, Vercel, AWS, Git, Linux, Playwright, pytest, Postman
Digital identity	Verifiable Credentials, digital wallets, Swagger/OpenAPI, authentication and QR flows
Languages spoken	Native Spanish and Catalan; intermediate English

Education

42 Madrid Programming Campus, Fundación Telefónica

2023 – Present

C/C++, UNIX, algorithms, processes, concurrency, networking and graphics. Projects: Minishell, cub3D, Philosophers, Pipex and C++ 00–08.

Advanced Diploma in Networked Computer Systems Administration (ASIR), ITEP

2020 – 2022
